

VIESSOID

Gr.4 Extreme Weather

LAND OF THE MIDNIGHT SUN

There are nine different aboriginal languages spoken in the NWT. Languages develop over thousands of years and they tell us a lot about the people who speak them and the environment that they live in. We asked speakers of some of these languages to translate some keywords related to the weather and the effect that weather can have on the land and the plants and animals that live there.

You'll see that some words translate easily and some need very long explanations. There are many words that have no translation. The same is true when trying to translate from aboriginal languages into English and French. We asked the translators to provide some back translations too. These show how different the literal meaning of the translation can be from the original English.

Erosion

When land gets carried away by water or wind.

Dogrib	Ndè nàdezà / The earth breaks it's self down
Inuktitut	Suruqpallianiq / Spoilage or damage that occurs over time
South Slavey	Ndéh dąh godemíh / Top soıl gets washed away
